GATWICK CO-ORDINATION GROUP OPPOSE GATWICK AIRPORT MASTERPLAN PROPOSALS

BEGINS

MP's from the Gatwick Co-ordination Group have expressed concerns about the rapid growth plans for Gatwick Airport. This follows Gatwick Airport's announcement today of expansion plans for what could be a three runway airport.

The MP's shared the following statement:

"Gatwick has grown significantly over the past decade. It has offered greater numbers of flights to more destinations and created jobs in the process. However, the benefits of growth have not been well distributed with the local community.

More people are impacted by Gatwick's noise operations than 10 years ago, both close to the airport and many miles away under flightpaths, creating health issues for local residents and congestion through inadequate infrastructure.

"Over the past few years Gatwick Airport has continually under invested in the local amenities and social infrastructure that would be required to support a project of this size and scale. We cannot support expansion of the Airport without a comprehensive investment in the local area which would ease pressure on the over-stretched road and rail systems serving the airport.

At a time of increasing concern about the environmental impact of global aviation growth, the proposed expansion plans would see a marked increase in carbon emissions, with clearer environmental consequences for us all. We should not be looking at unchecked expansion at our local airports but seeking managed growth that is proportionate to our other national priorities.

The safeguarding of land for a new full runway is a clear indication that Gatwick has future plans to build a third runway, as well as converting the current standby runway into a second runway. With today's announcement it is now clear that Gatwick Airport's new owners are determined to push for rapid commercial expansion and aviation growth despite the restrictions imposed upon the airport by its poor transport connections and its rural position adjacent to Green Belt land as well as the arguments made against a third runway at Gatwick in the London Runway Review.

We are keen to enable the airport to make viable returns for its shareholders however this also requires a sustainable and achievable plan for the future of Gatwick Airport which acknowledges the limitations on aviation growth at the site that exist due to local infrastructure, environmental and geographical factors.

Gatwick Airport's plans to build up to have up to three runways in operation do not represent a sustainable plan for the environment and the local community. It would mean more noise, more carbon emissions, faster climate change, more health problems for local residents and greater congestion. We have written to the Secretary of State to indicate our opposition."
